Dr. Anastasia Diakou

Laboratory of Parasitology and
Parasitic Diseases, School of
Veterinary Medicine, Aristotle
University of Thessaloniki, 54124
Thessaloniki, Greece

Dr. Simone Morelli

Faculty of Veterinary Medicine,
University of Teramo, 64100
Teramo, Italy

Deadline for manuscript
submissions:

closed (30 June 2021)

Message from the Guest Editors

Domestic cats are hugely distributed all over the world, and they are the most popular pets in Europe with a stable population of more than 70 million. Thus, the level of sanitary management in felid medicine is truly demanding, and parasitology plays a crucial role.

In this exciting context, *Pathogens* will launch a Special Issue devoted to “Felid Parasitoses, New Insights and Open Perspectives”, with the core aim of publishing the most recent and innovative information and knowledge obtained by outstanding research teams working in this field, and, at the same time, providing food for thought for an open discussion towards filling the gaps still open and implementing knowledge about felid parasites under a “One Health” perspective.

Both original research and review articles are welcomed. Potential topics include, but are not limited to, the following:

- Epizootiology/epidemiology of parasites transmitted via the faecal–oral route or by ectoparasite vectors
- Role of wildlife interplay in the “old” and “new” parasites of domestic cats
- New diagnostic assays and treatment measures
- Basic genetic and biomolecular features.

USA

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*General Immunology and Microbiology*)
