Modeling Virus Dynamics and Evolution

Guest Editor:

Dr. Igor M Rouzine

Evolution and immunology of pathogens, Laboratory of Computational and Quantitative Biology, Paris, France

Deadline for manuscript submissions:

closed (31 May 2020)

Message from the Guest Editor

Dear Colleagues,

This Special Issue of *Pathogens* invites novel and interesting contributions concerning the modeling of viral dynamics, immunology, and genetic evolution at any level of biological organization, from a cell to an individual to a population. We look forward to your contributions.

Dr. Igor M
Rouzine

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Lawrence S. Young

Warwick Medical School,
University of Warwick, Coventry
CV4 7AL, UK

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*General Immunology and Microbiology*)
