Spontaneous Diseases of Mollusks

Guest Editors:

Prof. Dr. Gionata De Vico

1. University of Naples Federico II
– Dept. of Biology
2. DVM, dipl. ECAAH (European
College of Aquatic Animal
Health - EBVS)

Prof. Dr. Francesca Carella

University of Naples Federico II

Message from the Guest Editors

Manuscripts describing how histopathology, electron microscopy, molecular techniques and novel diagnostic methods, can give an important contribution to diagnosis, are encouraged. Eventual focus on the ecological relevance of mollusks diseases will be also considered.

Deadline for manuscript
submissions:

closed (31 March 2021)

Department of Veterinary &
Biomedical Sciences, University
of Minnesota, Twin Cities, MN,
USA

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*General Immunology and Microbiology*)
