Message from the Guest Editors

Dear Colleagues,

We invite you to submit review articles and research results covering all aspects of the knowledge about *Streptomyces* microbiomes in agriculture, with the objectives to unveil the mechanistic aspects of biocontrol, suppressive soils or interactions with plants and other organisms, and the dynamics of streptomycetes assemblies under diverse natural and anthropological pressures. Reviews beyond the mere description of the literature and bringing to the light new evidence of scientific relevance thanks to a critical analysis of the past research will be particularly appreciated. Furthermore, primary and applied research opening novel, yet unexplored applications of streptomycetes is cherished.

We look forward to your contribution.

Dr. Giovanni Bubici

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*General Immunology and Microbiology*)
