

The Neglected Tropical Diseases (NTD)

Guest Editor:

Dr. Jose Muñoz Gutiérrez

Instituto de Salud Global de
Barcelona (ISGlobal), 08036
Barcelona, Spain

Deadline for manuscript
submissions:

closed (10 December 2021)

Message from the Guest Editor

Research activities should include operational and implementation research, evaluating new diagnostics, preventive and treatment approaches, not forgetting the behavioral and social aspects of the endemic communities. Innovation is a key element for the future and should include and adapt new enabling technologies such as molecular epidemiology, spatial epidemiology, mathematical modeling, data science, artificial intelligence or digital health to countries where NTDs are endemic.

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*General Immunology and Microbiology*)
