Update of Animal Parasitic Diseases

Guest Editor:

Dr. Elias Papadopoulos

Laboratory of Parasitology and Parasitic Diseases, School of Veterinary Medicine, Faculty of Health Sciences, Aristotle University of Thessaloniki, 54124 Thessaloniki, Greece

Message from the Guest Editor

This Special Issue seeks updated knowledge about the current situation of various parasitic diseases, particularly the emerging and re-emerging ones, within the frame of the global warming and the changing environmental conditions. Finally, the increasing development of resistant strains of parasites stresses the alarming need to reconsider the diagnostic methodologies and mostly the control strategies, both chemical and alternative.

Deadline for manuscript submissions:

Houston, TX 77030, USA

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
