Deadline for manuscript
submissions:

13 October 2024

Message from the Guest Editor

Membrane transporters have a key role in drug metabolism and toxicity; therefore the process of current drug development has to be concerned with the proper and early exploration of these potential interactions. In this regard, the most important transporters are the ABC drug extrusion pumps, especially the promiscuous multidrug transporters, and the various SLC transporters, promoting the uptake of a large number of drugs, as well as endo-and xenobiotics.

The aim of this Special Issue is to offer comprehensive reviews to our readers on the recent advances in the area of transporter-drug interactions, also calling attention to the increasing importance and regulatory requirements on examining such interactions in the early, as well as in the following phases of drug development.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (*Pharmaceutical Science*)
