Message from the Guest Editors

COVID-19 (coronavirus disease 2019) is a global outbreak of pneumonia and acute respiratory distress syndrome. The exceptionally rapid spread of the disease, which affects every age group, is leading to an urgent need for prophylactic and curative treatments. Consequently, combatting the causal agent SARS-CoV-2 has emerged as a tremendous challenge, gathering efforts from academia, pharmaceutical companies, hospitals, international organizations, as well as governments and philanthropic associations.

This Special Issue covers any aspect of that quest for treatments and welcomes opinions, brief reports, communications, research articles, as well as reviews.
