## Inflammation and Brain Diseases

Guest Editors:

### Dr. Chiara Cerri

Department of Pharmacy,  
University of Pisa, 56126 Pisa,  
Italy

### Dr. Lidia Ciccone

Department of Pharmacy,  
University of Pisa, Via Bonanno 6,  
56126 Pisa, Italy

### Dr. Susanna Nencetti

Associate Professor, Department  
of Pharmacy, University of Pisa,  
56126 Pisa, Italy

Deadline for manuscript  
submissions:

**closed (15 October 2023)**

### Message from the Guest Editors

Inflammation is the common denominator of several CNS pathologies. It is now well-accepted that inflammatory pathways are involved in the pathogenesis of several neurodegenerative disorders. Clinical observations and experimental findings support a link between inflammation and epilepsy. In the brain, the major players in the inflammatory response are resident cellular elements. Microglia and astrocytes are strongly activated in most neurodegenerative diseases and produce a variety of inflammatory mediators. However, in recent decades, most findings have suggested that inflammation exacerbates the pathological manifestation of CNS diseases. This evidence has framed inflammation as a common target for a broad range of CNS diseases. Thus, anti-inflammatory agents could potentially be effective for different pathologies. Approved anti-inflammatory drugs, as well as innovative, multifunctional, and/or hybrid molecules, are fundamental tools both in elucidating pathological pathways of brain diseases and in mitigating disease progression.

This SI aims to provide an overview of approved drugs exploited in brain diseases and to highlight state-of-the-art new compounds under study.

## Editor-in-Chief

### Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

## Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

*Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (*Pharmaceutical Science*)
