Message from the Guest Editor

Dear Colleagues,

This Special Issue will examine bacterial drug persistence, a phenomenon where the bacteria are able to survive in the presence of an otherwise lethal dose of an antibiotic without the development of resistance. Topics covered in this issue will include the basis of drug persistence, differences associated with drug persistence, and characterizing bacterial drug persisters. It also includes regulation of genes that may be tied to persistence, as well as pathogenesis if there is a possible connection to persister cells.

Professor Dr. William Schwan

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (*Pharmaceutical Science*)
