Message from the Guest Editor

Dear Colleagues,

Radiochemistry is the chemistry of radioactive materials. The research interest in this field of chemistry has experienced a big growth during the last decades, driven by a demand of being able to visualize biological processes in the human body. This special issue of *Pharmaceuticals*, dedicated to radiochemistry, calls for both fundamental and applied contributions in this field of growing academic and industrial interests. Special attention will be paid to paper which has a high degree of novelty, which can contribute to making everyday life easier for radiochemists, which can have a (potential) diagnostic impact or/and which contribute to the understanding of biological processes *in vivo*.
