Message from the Guest Editors

Dear Colleagues,

In recent years, nanocarriers have attracted a significant amount of attention in various biomedical applications, such as site-specific drug delivery and imaging diagnosis. Nano-sized systems based on polymers, metals, and lipids present a high potential to improve the retention and release of chemotherapeutics in cancer cells and tissues, minimize the associated systemic side effects, and overcome multi-drug resistance. They exhibit distinctive physicochemical characteristics, such as biocompatibility, chemical stability, and a reactive surface. These promising vehicles are expected to overcome the limitations of chemotherapeutic agents, such as a lack of biodistribution as well as poor solubility and stability.

Authors are kindly invited to submit original papers and reviews regarding the potential applications of different types of nanocarriers as drug delivery systems for cancer therapy and diagnosis to be published in this Special Issue of *Pharmaceutics*.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
