### Message from the Guest Editors

This Special Issue will focus on the latest research in the field of nanocarrier-based antibacterial agents. Topics of interest include the following:

The design and synthesis of novel antibacterial agent-loaded nanocarriers;

The characterization of the antibacterial activity of nanocarriers;

The delivery of antibacterial agent-loaded nanocarriers to specific targets;

The in vitro and in vivo safety and efficacy of antibacterial agent-loaded nanocarriers.

This Special Issue is intended for researchers and clinicians working in the field of antibacterial drug delivery. It will be of interest to scientists and engineers working on the design and development of new antibacterial agent-loaded nanocarriers, as well as clinicians who are evaluating the use of nanocarriers in the treatment of bacterial infections.

We invite original research articles, review articles, and short communications on the topics listed above. Manuscripts should be submitted in English and should follow the guidelines of the journal *Pharmaceutics*.

## Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
