Message from the Guest Editors

This Special Issue aims to cover the diverse range of natural extracts and their bioactive components from plants, marines, etc., for inflammation and cancer treatment in terms of molecular mechanisms and novel components. Articles including original research or reviews will be welcome and the topics are expected to focus on but are not limited to: (1) research on novel natural extracts or components for inflammation and cancer; (2) new approaches for extractions; (3) the molecular mechanisms of natural extracts or active components, including signal transduction, inflammatory cytokines, and microbiome/metabolite-mediated regulation; and (4) apply for the pharmacokinetics, pharmacodynamics and delivery systems.
