Message from the Guest Editors

Dear Colleagues,

It is well-known that pregnancy induces significant changes in both pharmacokinetics and pharmacodynamics of most drugs with a high intra- and interpatient variability. Unfortunately, data on long-term safety of the prenatal and breastfeeding-exposed infants are still lacking for many drugs. For this reason, most medications do not include labelling information about their use during pregnancy and lactation. Choosing the appropriate drug dose for a pregnant and nursing woman is a difficult balancing act between optimal maternal treatment and minimal risk of harm to the fetuses and/or breastfed infants. Therapeutic drug monitoring may be a useful tool for dose adjustment in this period, and analysis of the umbilical cord/maternal serum drug concentration ratio is the method recommended to assess transplacental transfer. Recognizing pregnant and lactating women as special populations is essential to obtain information about the safety and efficacy of drugs, which is of crucial importance. This Special Issue welcomes the submission of original and review articles.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
