Message from the Guest Editor

Dear Colleagues,

Medication adherence is the process by which patients take their medication as prescribed and is an umbrella term that encompasses all aspects of medication use patterns. Patient adherence is a prerequisite for achieving the desired therapeutic outcome. Different methods exist to assess adherence, all with their pros and cons, and none represent the gold standard. Thus, various interventions to improve medication adherence have been developed and tested so far, but very few have demonstrated an effect on therapeutic outcomes. With the boom of new technologies to assess medication use, such as m-health, it is time to demonstrate the impact of adherence interventions on health outcomes.

Based on this research topic, we will focus on adherence interventions whose endpoints are health outcomes. Single or multiple (polypharmacy) medications can be considered, and the research can be theory- or practice-based.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
