Message from the Guest Editors

Dear Colleagues,

For many decades, drug delivery vehicles have consisted of particles, for example, prepared from lipids, polymers or a combination of the two. Often, these systems are sufficient to deliver drugs to their target, but for some drugs, more advanced delivery vehicles are needed to obtain sufficient absorption and bioavailability.

Within the last 10 years, top-down methods for creating nano- and microdevices have been suggested to be promising approaches for delivering drugs. The devices appear to be able to provide a more targeted delivery compared to, for example, particulates. Devices have been used for delivering drugs, e.g., via the oral, buccal and pulmonary route of administration, but also via injections.

This Special Issue aims to provide an update on current and recent progress within nano- and microdevices for the delivery of drugs, vaccines and bioactives. Papers focusing on the design of the devices, fabrication, their characterization, drug encapsulation, drug release, and in vitro and in vivo studies are all of interest. Other relevant topics including microfabrication techniques and 3D printing devices for targeting drug delivery are also welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
