Message from the Guest Editors

Dear Colleagues,

The current diversification of drug discovery methods has sparked a revolution in technologies for seeking active pharmaceutical ingredients. Simultaneously, the developments in drug administration methods form new modalities and low-molecular-weight drugs. Consequently, there is a growing need to establish methodologies that facilitate easy administration, particularly for children and patients with dementia. If sufficient quantities of drugs, including medium-sized molecules, can be effectively administered through the skin, it could significantly advance overall drug therapy. For this Special Issue, we encourage scientists worldwide to propose innovations in penetration enhancement techniques that enable transdermal delivery not only for small molecules, but also for medium-sized drugs.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
