Message from the Guest Editor

Dear Colleagues,

In the era of technological progress in many fields of medicine, improvement of the quality and safety of anesthesia and perioperative care, including effective pain relief, is extremely important. Pain, both acute and chronic, is unfortunately still a common reality that increases the risk of complications in the postoperative period. It is also a source of patients' suffering and significantly diminishes their quality of life. Due to a great variety of mechanisms involved in the process of nociception, multimodal analgesia is the currently recommended pain management strategy. It involves use of drugs and techniques with different mechanisms of action to obtain the optimal therapeutic effect and minimize the risk of side effects and complications. Because the efficacy of pain management is not sufficient, new drugs or combinations of drugs are investigated and searched for. This Themed Issue on "Advanced Technology of Pharmaceuticals in Anesthesia and Analgesia" aims to present new drugs and technologies in anesthesia and analgesia which are focused on improvement of safety and quality of anesthesia and pain management.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
