Message from the Guest Editors

Dear Colleagues,

Topical therapy is often preferred to a systemic one because it allows treating the pathological site, avoiding healthy tissues. The success of a local therapy derives from the use of a suitable active ingredient adequately formulated. Many formulations show a limited low residence time responsible for partial and incomplete treatment. This is responsible for delayed healing times and risks of recurrence in the case of infections. This problem is particularly emphasized in the case of ulcers of both skin and mucosa.

The development of new technologies that are able to enhance the residence time of topically applied drugs is necessary for the treatment of local pathologies.

In this context, bioadhesive delivery systems are strategic and useful tools for the local treatment of skin and mucosal diseases.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
