Message from the Guest Editors

Dear Colleagues,

It is estimated that microbial biofilms impact the management of over 75% of all human infections. The presence of biofilms is associated with the emergence of antimicrobial drug resistance, the development of chronic infections, limitations of the ability of the host immune system to eradicate an infection, and the contamination of medical devices. The critical role of microbial biofilms in the progression and severity of infections has resulted in significant efforts to develop new strategies to combat them.

The focus of this Special Issue of *Pharmaceutics* will be on recent advances in the development of effective strategies to control, eliminate, and prevent the formation of biofilms. Both research and review articles are welcome.

Dr. Jennifer Fiegel

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
