Message from the Guest Editors

Dear Colleagues,

Pulmonary drug delivery is an emerging field of research, due to the potential for both local and systemic drug action, as well as targeted and/or modified drug release. Dry powders for inhalation (DPIs) are currently in the spotlight of inhalation formulation design, due to the great potential for engineering of their aerodynamic properties, improved stability and convenience for administration. DPI design and preparation are challenging, from the perspective of excipient selection, manufacturing process optimization, packaging, and selection of the appropriate inhaler. A variety of in vitro and in silico characterization methods for the formulation development and quality control phase are available that can facilitate selection of the optimal formulations. Furthermore, recent efforts in the design of in silico physiologically based modeling tools have enabled the assessment of drug–formulation–physiology interplay, fostering the development of DPIs with the desired bioperformance.

This Special Issue aims to present state-of-the-art and future perspectives of research in the field of dry powder formulation for inhalation.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
