### Message from the Guest Editors

Dear Colleagues,

Currently, therapeutic macromolecules are popular for the treatment of several diseases. Enzymes, proteins, peptide-based actives or genetic material are being investigated in terms of action, yet the special characteristics of these type of actives could be an issue for their delivery to the therapeutic target. Over the last few decades, one of the goals of drug delivery science has been to develop systems able to host and maintain the activity of these molecules.

This Special Issue, entitled “**Advances in Controlled Delivery of Therapeutic Biomacromolecules**”, aims to present the current state of the art of the field. Emphasis is placed on novel platforms and materials for their delivery through any administration route, highlighting the most challenging aspects of modern biopharmaceutical science.

We invite research scientists from the pharmaceutical industry or academia to submit original research articles, review articles with a focus on novel therapeutic biomolecule delivery systems.

Dr. María Isabel Rial-Hermida

## Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
