Message from the Guest Editors

Dear Colleagues,

Polymeric nanomicelles have received significant attention for drug delivery, and they have been extensively studied in various diseases such as cancer, diabetes, and brain diseases. In addition, the methods of administration are also diversified, such as nasal administration, intravenous injection, subcutaneous injection, oral administration, and skin administration. These determine the final polymeric nanomicelles' performances as advanced carriers for drug products.

This Special Issue will cover different areas of polymeric nanomicelles as a means to control or modify the release of drug substances from drug delivery systems. Contributions to this Special Issue can be original research or review articles and may cover all aspects of polymeric nanomicelles, ranging from design to production and characterization from both technological and a biological points of view for the correct use of such polymeric nanomicelles as drug carriers.

We would like to thank in advance all authors who take time out of their busy schedules to contribute to this Special Issue of *Pharmaceutics*.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
