Message from the Guest Editors

Dear Colleagues,

Liposomes were discovered in the 1960s by Alec Bangham and have since been widely used in the field of pharmaceutical technology. Their use for drug targeting and tumour therapy were major breakthroughs in the field of medicine. Recently, studies have pointed to the use of these nanostructures with some functionalization models such as imaging agents, targeting of specific tissues, co-delivery of drugs, or genetic material encapsulation for the treatment of several cancer models.

In this issue, we aim to present the latest articles, recent advances, and state-of-the-art in targeting and cancer therapy involving liposomes.

Dr. Sued Eustáquio Mendes Miranda

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
