Message from the Guest Editors

Dear Colleagues,

Nanoparticle drug delivery systems (NDDSs) have attracted tremendous attention in tumor-targeted drug delivery, with the fascination concerning novel properties of nanoparticles mainly stemming from the fact that nanoparticles have a huge surface area compared to microparticles or bulk materials. To control drug delivery with a very slow drug release into the blood circulation, yet with a fast drug release at tumor tissues, smart nanoparticles capable of releasing more drug molecules upon the stimulation of the tumor microenvironment are crucial for improving antitumor efficacy.

This Special Issue aims to discuss the latest research progress of novel smart nanoparticles, including the design, preparation, and their applications in tumor-targeted drug delivery. This is a very useful resource for researchers who are actively involved in NDDSs. We accept original research articles, critical review papers, and commentaries providing a further understanding regarding novel smart nanoparticles for tumor-targeted drug delivery.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
