Deadline for manuscript
submissions:

30 September 2024

Message from the Guest Editors

Dear Colleagues,

Nanoparticles used for drug delivery include numerous structures capable of transporting active ingredients through different administration routes, offering advantages such as drug protection, an easier access of the drug across biological membranes. In recent years, the rise of antibiotic resistance has underscored the urgent need for novel therapeutic strategies, however, resistance mechanisms can cause microorganisms to spread without responding to treatment. Nanocarriers can protect drugs from degradation and facilitate their passage through the cell membrane of microorganisms, consequently improve drug efficacy and circumvent microbial resistance mechanisms. We invite researchers to submit high-quality, original manuscripts on the design, synthesis, and application of nanoparticles with enhanced antibacterial properties. Contributions may include studies on the optimization of different types of nanocarriers including solid lipid nanoparticles, polymeric nanoparticles, nanocrystals, etc., with all geared towards maximizing the antibacterial efficacy while minimizing adverse effects.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
