Message from the Guest Editor

Dear Colleagues,

To meet the growing demand for biopharmaceuticals, the development of highly efficient production platforms is warranted. Although state-of-the-art industrial manufacturing processes allow productivity of over g/L for numerous monoclonal antibodies, the expansion of the biopharmaceutical industry pipeline with a wide range of non-native proteins, such as bispecific antibodies and fusion proteins, poses questions regarding both the manufacturability and timelines to achieve a commercially viable solution. This Special Issue aims to explore the emerging trends in the platforms and manufacturing processes for the production of biopharmaceuticals. In this Special Issue, original research articles and reviews are welcome. Research areas may include but not be limited to recent advances in mammalian-based production of biopharmaceuticals and manufacturing platforms, alternative mammalian expression platforms, including cell-free and gene-based expression systems, issues in manufacturing therapeutics in a non-native format, etc.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
