Message from the Guest Editor

Dear Colleagues,

Central nervous system (CNS) disorders are some of the most prevalent, devastating and yet poorly treated diseases. The numbers of people afflicted with CNS disorders are increasing. In addition to the complexity of CNS diseases, the lack of efficient technologies to deliver drugs into the CNS or understand CNS diseases hinders CNS treatments. Nanomedicines utilize various transport mechanisms to deliver drugs into the brain. In addition, non-invasive techniques such as ultrasound and magnetic resonance imaging can be combined with nanomedicines to enhance the treatment, imaging, and diagnostics for CNS diseases.

The goal of the Special Issue is to collect research articles and reviews to capture the current state-of-the-art of nanomedicines for CNS diseases. Studies on nanomedicines or the combination of nanomedicines with non-invasive techniques to treat and diagnose CNS diseases or to understand the pathologies of CNS diseases are welcome for submission to this Special Issue.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
