Message from the Guest Editors

Dear Colleagues,

Malignant diseases are one of the most powerful diseases of the current century, representing a major cause of death globally. Besides the screening of synthetic molecules with anticancer potential, natural compounds represent a valuable alternative to the limitations of conventional chemotherapy. Natural compounds also face drawbacks that limit their utilization, such as poor water solubility, low dissolution rate, bioavailability, and increased sensitivity to degradation and inactivation.

Cyclodextrins are, nowadays, considered valuable pharmaceutical excipients due to their ability to partly or completely include a drug molecule, thus improving the unfavorable physicochemical and the biological properties of the hosted molecule.

Currently, the development of improved formulations based on natural and synthetic compounds with increased bioavailability and stability, along with dose reduction and the reduction in adverse effects, represent topical issues.

This Special Issue will bring together recent data regarding the role of cyclodextrins in developing improved delivery systems containing anticancer compounds.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
