Message from the Guest Editors

Dear Colleagues,

The field of therapeutic drug monitoring (TDM) is experiencing a revolution; it is becoming an important supporting tool for clinical decision making in various fields of pharmacotherapy. From the simplified evaluation of drug concentrations collected at the trough or, in certain cases, at other time points following drug administration, based on therapeutic ranges, this field has improved into one with a focus on providing *in vivo* pharmacokinetic information for the personalized modulation of drug regimens.

The aim of this Special Issue is to deliver up-to-date, state-of-the-art research regarding the analysis of drugs and their metabolites in clinical samples, the use of novel sampling technologies including microsampling, and the employment of bioinformatic applications to translate TDM results to clinically relevant information. The application of these tools for use in assessing patient adherence, countering adverse effects and events, establishing increased effectiveness and the safety of drug therapy, improving the cost-efficiency of treatments, or identifying patient sub-populations based on TDM, among other applications, are of great interest.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
