Deadline for manuscript
submissions:

closed (20 December 2021)

Message from the Guest Editor

Dear Colleagues,

The interactions between nanomaterials and cells impact the development of nanomedicine and the performance of many formulations. Additionally, nanomaterials can accumulate in nature in various ways and impact quality and quantity of life. Still, nanomaterials offer great promise, and understanding how nanomaterials behave at the interface of life is crucial to the future development of areas ranging from pharmaceutics to diagnostics, and even to fields such as agriculture and synthetic biology.

This Special Issue investigates the interface of life and nanomaterials for a range of applications, with the aim of building a deeper understanding of the fundamental interactions involved. For example, it is now known that different cell types uptake different quantities of nanoparticles. Moreover, it has recently been demonstrated that some nanomaterials can be grown in or on different cell types. Although these interactions extend beyond medicine, the principles and fundamentals elucidated during their investigations offer the potential to transform the development of pharmaceutics and other areas.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
