### Message from the Guest Editors

Dear Colleagues,

Nanocarrier technology in drug delivery research has achieved reasonable success in the development of modern therapies, permitting better bioavailability and pharmacodynamics, as well as reducing side effects and providing the possibility of specific targeting of the drug. In particular, due to their biocompatibility and flexibility, supramolecular lipid-aggregate-based nanocarriers, such as lipid nanoparticles, liposomes, nanoemulsions, and micelles, have been the subjects of extensive studies that resulted in several technologies and commercially available therapeutics, including Ambisome, Doxil or recently registered ONPATTRO (patísiran). These seem to be only a small fraction of the opportunities provided by the system built from naturally occurring lipids and similar non-toxic organic compounds. No commercial lipid-based preparation has explored the possibility of targeting the diseased site in the body with lipid aggregate-packed drugs. Hereby, we invite all researchers to contribute to this Special Issue, which will collect review articles devoted to various aspects of lipid aggregate-based drug nanocarrier studies.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
