Message from the Guest Editor

This Special Issue on nanocrystals will include a variety of research articles, both reviews and original research contributions, dealing with drug nanocrystals. From the production methods and process understanding to the fate of the nanocrystals in vivo, this Issue aims to provide an overview of well-established nanocrystallization techniques, marketed products, and promising new approaches in the modification of nanocrystals, for example, for controlled or targeted drug delivery applications in various routes of drug administration. All kind of contributions discussing the ability of nanocrystals for a wide variety of drug delivery purposes as well as limitations of the techniques are invited.
