Deadline for manuscript submissions:

**closed (1 December 2022)**

### Message from the Guest Editors

Photothermal therapy has emerged as a highly promising strategy for the treatment of superficial and localized tumors. It is a minimally invasive technique that takes advantage of the increased sensitivity of cancer cells to heat, relying on the induction of thermal ablation of tumor cells through irradiation with light beams. In addition, it is also considered safe, enabling a faster recovery of the patient compared with other existing therapeutic approaches.

An overview of several nanoparticles for photothermal and photodynamic therapy will be herein presented, with a focus on different methods of preparation and in vitro and in vivo studies, including clinical studies using this nanotechnological approach for cancer management.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
