Deadline for manuscript submissions:

closed (10 December 2021)

Message from the Guest Editors

Nanoscale delivery systems designed for cancer treatment and diagnosis are a rapidly developing science. The delivery of anticancer agent combinations allows the targeting of different pathways, genes, or cell cycle checkpoints so that resistance to single agents can be overcome. Multiple studies in this field have shown the potential of simultaneous release of different agents to the tumor site. Not only that, but also the possibility to control the delivered ratios of these agents, improving synergistic antitumor effects. Meanwhile, the delivery of an anticancer agent and a medical imaging agent allows simultaneous cancer therapy and imaging, significantly improving cancer management. These approaches are often further combined to strategies such as active targeting or triggered delivery, culminating in highly multifunctional nanoscale systems.

This Special Issue will highlight current advances and challenges in the broad theme of nanosystem development for the delivery of molecules to treat and/or diagnose tumors. We encourage the submission of focused review manuscripts as well as original research concerning *in vitro*, *in vivo*, and translational studies.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
