Message from the Guest Editor

Dear Colleagues,

A nonbiological complex drug (NBCD) is a medicinal product, not a biological medicine, where the active substance is not a homomolecular structure but consists of different (closely related and often nanoparticulate) structures that cannot be isolated and fully quantitated, characterized, and/or described by physicochemical analytical means. Nano/microparticle-based delivery systems can be included in the NBCD class. This Special Issue focuses on nano/microparticle delivery system technologies (liposome, lipid nanoparticles, polymeric nanoparticles, polymeric micelles, polymeric microparticles) used in NBCD.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
