Message from the Guest Editor

Dear Colleagues,

Following their formation, Active Pharmaceutical Ingredients (APIs) undergo several process steps to form a solid dosage form, such as milling, mixing/blending, granulation, die-filling and tableting. Although the overall process has been around for many years, challenges remain for each of these unit operations in terms of design, control and optimisation. Additionally, there is a drive towards continuous pharmaceutical manufacturing, which brings its own set of novel challenges. This Special Issue: "Recent Advances in Secondary Processing of Pharmaceutical Powders" aims to highlight the state of the art in all aspects of pharmaceutical production that follow crystallisation, including the processing of excipients.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
