Message from the Guest Editors

Due to the growing use of herbal medicine and easy of taking herbal medicine formulation with therapeutics drugs and with a trend of polypills, adverse drug reactions or drug/herb-drug interactions caused by co-administration of therapeutic drugs and herbal medicine have been rapidly growing. About 25% of herbal supplemental users regularly take prescribed drugs, which increased the possibility of herb-drug interaction. The most frequently reported case of herb-drug interactions included the modulation of herbal medicine on drug metabolizing enzymes and transporters and the causative pharmacokinetic effect of co-administered therapeutic drugs that are substrate for drug metabolizing enzymes and transporters.

Therefore, this special issue has the aim of highlighting the pharmacokinetic drug-drug interactions and herb-drug interaction and their mechanistic understanding in relation to the drug metabolizing enzymes and drug transporters. For this, the bioanalytical method development for the measurement of pharmacological active component of concomitantly administered herbal medicines is also important.

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
