### Message from the Guest Editor

Dear Colleagues,

In the last decade, emerging trends in combinatorial chemistry and drug design have rendered newly developed drug molecules with higher lipophilicity, larger molecular weight, and poor water solubility. As a result, the majority of new drug development results in failure due to the poor water solubility of the drug molecules.

The optimization of such poorly water-soluble molecules for enhanced solubility, dissolution, and ultimately enhanced bioavailability is the most important prerequisite to develop drug products. To overcome the poor water solubility, various approaches to enhance the dissolution rate include solid dispersion, supercritical fluid technology, prodrugs, co-crystal formation, cyclodextrin complexes, lipid-based formulations, etc. Furthermore, the convergence of diverse technologies is also recommended for the modulation of the release rate and enhanced bioavailability for better patient adherence.

This Special Issue is aimed at highlighting the latest progress and research of pharmaceutical and biopharmaceutical technologies for the enhanced bioavailability of poorly water soluble drugs.

## Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
