### Message from the Guest Editors

Dear Colleagues,

Nanomedicines have been largely investigated as a useful tool for drug delivery and drug targeting. Among the proposed approaches aiming to facilitate the technology transfer of nanomedicines, biomaterials and formulations able to spontaneously form nanoscale systems are very attractive. In this context, lipids and polymers have been largely proposed for the delivery of nucleic acids; polypeptides have been studied as building materials for drug delivery systems; inorganic or polymeric biomaterials have been combined to assemble in hybrid nanosystems, by mixing two or more components or by layer-by-layer strategy. Finally, formulations prepared by self-emulsifying have been proposed, especially for oral administration. All these approaches do not require high energy for the preparation and should be easy to transfer to large scale production with limited costs of production.

The aim of this Special Issue is to highlight the most recent innovations in the field of self-assembling and self-emulsifying delivery systems, thus providing an updated landscape of the state-of-art in the field, focusing both on the biomaterials and the applications.

## Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
