Message from the Guest Editor

Dear Colleagues,

Silica nanoparticles have been widely used in biomedical applications due to the easy synthesis of different sizes and morphology, their biocompatibility, and easy surface functionalization. Such nanoparticles have shown tremendous potential as adsorbents and carriers of drugs and other therapeutic molecules. Their nanosize allows the particles to easily permeate tumour tissues via passive mechanisms, but the efficacy can be improved by active targeting. The pore sizes and morphology can be tailored to the application, and a wide array of molecules carried to the site of interest.

This Special Issue has the aim of highlighting current progress in the use of silica nanoparticles for the delivery of therapeutic molecules, and imaging agents. Suggested topics include: new synthesis methods for unique morphologies, new approaches in targeted delivery, nanoparticle design for improved uptake in target cells, and modifications of the silica with doping agents or dyes.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
