Message from the Guest Editor

Dear Colleagues,

Protein drugs are the most active and fast-growing part in the field of drug research and development, and one of the most promising industries in the twenty-first century. Therapeutic protein drugs are an important class of medicines serving patients most in need of novel therapies. Protein drugs are developed to treat a wide variety of clinical indications, including cancers, autoimmune diseases, inflammation, diabetes neurodegenerative effects, exposure to infectious agents, and genetic disorders. Recent approved recombinant protein therapeutics has been used to target specific sites. A confluence of computational and high-throughput experimental methods for protein-engineering and “off the shelf” platform technologies has ushered in unprecedented opportunities to develop safe, effective, and more convenient protein therapeutics.

In this Special Issue, we invite authors to report their recently developed protein-based strategies for diagnosis and/or treatment of various disease states. We also welcome reviewer articles with expert opinions and perspectives in the protein therapeutics in biopharmaceutics field.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
