Special Issue

Drug Delivery in the Reproductive Systems

Message from the Guest Editors

The aim of this Special Issue, therefore, is to showcase original research articles and reviews focusing on advanced drug delivery platforms for the treatment of conditions within the human reproductive system.

Research areas may include, but are not limited to, the following:

Novel synthesis of delivery systems, drug formulations, and development technologies for the treatment of conditions related to the human reproductive system;

Novel prophylactic treatment platforms for conditions related to the human reproductive system;

Targeting of specific cell populations or intracellular targeting in the human reproductive system environment;

Design of advanced targeted drug delivery devices for increased dosing accuracy and reproducibility;

Advanced drug delivery approaches for biopharmaceuticals including vaccines, antibiotics, nucleic acids, proteins and peptides.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
