Special Issue

Development of Chitosan/Cyclodextrins in Drug Delivery Field

Message from the Guest Editor

Chitosan is a polysaccharide derived by the deacetylation of the naturally occurring polymer chitin. Due to its excellent biocompatibility, biodegradability, lack of allergenicity, and antibacterial activity, chitosan has been widely used in drug delivery systems for nearly every route of administration, including biomaterials for tissue-engineered scaffolds and wound dressings. On the other hand, the well-known use of cyclodextrins in pharmaceuticals is due to their effective complexing capacity to increase the solubility and bioavailability of poorly water-soluble drugs. Despite a significant quantity of research and an equal amount of commercial products, chitosan and cyclodextrins continue to be of interest to both the academic and industrial communities, and there is no doubt that further advancements and uses will be made in the future. This Special Issue welcomes original research articles and reviews that cover all aspects of the design, manufacturing, characterization, and final formulation of chitosan/cyclodextrin-based drug delivery systems, but not limited.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
