# Novel Therapeutic Approaches for the Treatment of Neurodegenerative Diseases

### Message from the Guest Editors

In the last two decades, the number of people living with neurodegenerative disorders has raised due to increased aging of world population, and their social and economic burden has become a major health issue.

This notwithstanding, despite the great efforts dedicated to the identification new therapeutic targets and development of innovative disease-modifying agents, we still miss effective approaches able to halt or delay symptom progression and neurodegeneration in the brain of patients affected by these highly disabling conditions.

The aim of this Special Issue is to collect the latest research on novel therapeutic targets, as well as innovative deliveries or formulations, for the design and pharmacological characterization of disease-modifying agents, counteracting neuronal loss, exerting neuroprotection or reducing pathological protein aggregates in neurodegenerative diseases.

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
