

Topical Collection

Advanced Pharmaceutical Research in the Czech Republic

Message from the Collection Editors

In recent decades, pharmaceutical sciences and engineering have come to represent a rapidly developing area in the Czech Republic. The aim of this regional issue is to bring an overview of the progress in this field. Researchers from both the academic and industrial spheres are welcome to submit their research or review articles focused on preformulation and formulation development, drug delivery, nanoparticulate formulation, polymer science, biopharmaceutics and pharmacokinetics, personalized medicine, or other related topics. We intend to create a high-quality collection presenting novel results and attitudes. Moreover, we believe the issue will contribute to the discussion on these exciting topics and help to form new scientific collaborations.
