Drug Polymorphism and Dosage Form Design

Message from the Guest Editors

Extensive academic and industrial research demonstrated that more than 50% of the currently used APIs shows multiple physical arrangement of the constituents in the crystal lattice. This polymorphism significantly influences a variety of drug properties, including dissolution rate, solubility, tabletability, flowability, stability and even bioavailability, efficacy and toxicity. Original research articles and review articles dealing with all the aspects of drug polymorphism are considered. Particularly, the discovery of new crystal forms, methods for their preparation, influence of the polymorphism on the physicochemical properties, analytical methods for the study of crystal forms, API stability during processing and storage, biological effects of polymorphism, preformulation studies, design of dosage forms and regulatory implications are all included in this Special Issue.

- Amorphism
- Dissolution
- Polymorphism
- Dosage form
- Bioavailability
- Stability
- Mechanical properties
- Tabletability
- Flowability

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.5 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2024).
