Fighting Fungal Infections: Emerging Nanosystems Strategies

Message from the Guest Editors

The treatment of fungal infections is a challenge for both medical and scientific communities. The lack of selectivity, associated side effects, and the limited spectrum of antifungal agents, as well as the emergence of new virulent and drug-resistant fungi, justify the search for new drugs and the development of novel formulations. Nanosystems have gained prominence as alternatives to overcome the limitations of conventional formulations in the therapy and delivery of antifungal agents; Furthermore, the development of antifungal encapsulating technologies enables controlled drug release while protecting the active principle, preventing its off-target toxicity and degradation. Nanosystems can also be used in the development of vaccines against fungal infections. This Special Issue aims to present a collection of studies describing recent advances in the development of nanosystems approaches suited for antifungal therapy and prophylaxis, as well as those highlighting the benefits and drawbacks of nanoscale solutions when multiple routes of administration are considered.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.5 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2024).
