Deadline for manuscript submissions:
closed (22 February 2023)

Message from the Guest Editor

Mental health disorders, including addictions, contribute significantly to the global burden of disease. Around the world, pharmacists are making significant contributions towards addressing this burden. Pharmacists encounter patients with mental health disorders in all areas of practice, and these disorders can be an important component of their clinical care needs, whether they are the reason for seeking care or not. Therefore, the role of the pharmacist can take many forms across a variety of settings, for example, primary care, hospitals, specialty clinics, government, health organizations, etc. This Special Issue invites research papers that address pharmacists' roles, services, and impacts in any setting across the spectrum of mental health and addiction conditions. The goal is to collate and highlight pharmacy practice impacts on the global burden of addiction and mental health disorders.

Special Issue
